-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/006121, filed on 12/10/2001.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7-8, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Mueller (US 4,771,589). Mueller'589 discloses an apparatus with an arraying and supplying station via a feeder not shown numerically (see col. 3, lines 65-68) for supplying the encased products "C" with the caps oriented in one direction, a sorting station at the vicinity of "12" for sorting the encased products "C" to a first feed path "14" in a first attitude "C", a second feed path "16" for feeding the encased products in a second attitude "C1", a packaging station "26" for packaging the encased products with a packaging sheet (see Fig. 2), and a movable presser (not shown numerically) at the vicinity of "130".

The first attitude is an attitude to array the encased products abreast, i.e. side by side, as shown in Figs. 1 and 2, wherein a first delivery unit "90" for feeding a first group "C" of the encased products with the caps oriented upwardly and a second delivery unit "70" for inverting a second group "C1" of the encased products to orient the caps

downwardly, and feeding the encased products to discharge the encased products alternately via station "22".

The first and second delivery units "90,70" comprise respective first and second screws (see Fig. 1), wherein the second delivery unit "70" have guides (see Fig. 3) for reversing the encased products in co-action with the second screw "70"

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mueller'589 in view of Baranowski (US 5,407,057). Mueller'589 discloses the invention substantially as claimed. Mueller'589 does not disclose that the second feed path "16" has a knock-down mechanism for knocking down the encased products, wherein the encased products are arrayed tandem. However, Baranowski'057 teaches a knock-down mechanism (see Fig. 9) for the purpose of displaying the products "12" from a vertical attitude to an horizontal altitude, thereby providing a tandem configuration wherein the products "12" are placed one behind the other. In view of Baranowski'057, it would have been obvious to one having ordinary skills in the art to have provided Mueller's second feed path "16" with a knock-down mechanism in order to display the encased products from a vertical attitude to an horizontal altitude, thereby providing a tandem configuration wherein the encased products are placed one behind the other.

Allowable Subject Matter

4. Claims 9, 12, and 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pepitone'878, reimers'111, Cook'473, Sorace'128, Martin'979, Baranowski'465, Nakagoshi'247, and Meyers'047 are cited to show related inventions.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Lopez whose telephone number is 703-305-8205. The examiner can normally be reached on Monday - Thursday: 8:00 am - 6:00 pm.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 703-308-2187. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
